

Seat programme New XF

Excellent comfort

The main application of the DAF XF is long-distance transport, which implies that drivers spend many hours a day behind the wheel. For a healthy and safe working environment drivers deserve the best in seating comfort and ergonomics.

That's why the DAF seat programme was not just selected from a supplier's catalogue, but was jointly developed with the seat manufacturer, in order to create a unique seat that has all a driver could wish.

Four different executions of the air suspended seat offer excellent comfort combined with ergonomic, intuitive function control. Safety is served by an integrated head restraint and a three-point seatbelt with height adjustment. All seats feature longitudinal and vertical adjustment over a large range, seat tilt adjustment and - depending on the seat type - a seat cushion damper, various air bellows for adaptable lumbar support and two-step heating of the seat cushion and back rest.

A comfortable workplace, hour after hour

Much attention was given to the dimensions and ergonomic shape of the seat. New materials were carefully selected and tested to guarantee the highest comfort, also after years of service. Breathing fabrics are backed by a thick moisture-absorbing layer to maintain an optimum microclimate and preserve the highest comfort throughout the day.

The Xtra Leather Air seat has a prestigious, two-tone, full leather upholstery with stylish double stitching accents, which perfectly matches with the Exclusive interior trim of the cab. This seat may be combined with the Exclusive leather finish steering wheel.

Intuitive control

Ergonomic control was a major requirement in the design phase. Large controls are logically arranged in such a way that they can be easily found and their functions can hardly be mistaken.

Seat programme New XF

	Basic ¹⁾	Comfort	Luxury	Super	Xtra Leather
					
Suspension	Fixed	Air	Air	Air	Air
Four steps seat cushion damper	-	-	•	•	•
Quick lowering adjustment	-	•	•	•	•
Longitudinal / Vertical adjustment (mm)	220 / -	220 / 145	220 / 145	220 / 145	220 / 145

1) Only available as co-driver seat

2) Only available on driver seat

3) Seat upholstery Super Air:

- Front part of the seat cushion and upper part of the back rest: fabric
- Back part of the seat cushion, seat borders and lower part of the back rest: alcantara
- Left- and right-hand side of the seat as well as head restraint: leather

Adjustable arm rest at the inner side.

An adjustable arm rest at the inner side of the driver seat is optional. As even in the folded position this arm rest impairs easy reach of the gear shift lever, it is not recommended for manual gearboxes in application that involve frequent gear shift.

The optional arm rest at the inner side of the Xtra Leather Air driver seat is supplied with a leather cover.

The Xtra Leather Air driver seat may be combined with the Exclusive leather finish steering wheel.

Depending on the vehicle configuration a specific option may not be possible. The availability and specification may differ per country.
