

Long Distance Pack

- **MX Engine Brake**
- **Alcoa aluminium wheels**
- **Predictive Cruise Control**
- **1435 litres fuel tank capacity**
- **Tyre Pressure Monitoring**

XF

DAF

MX ENGINE BRAKE

Safe, reliable braking and reduced brake pad wear. The MX Engine Brake is a great performer, whatever the circumstances.

LIGHTEST AND STRONGEST WHEELS

One single piece forged aluminium wheels with an excellent impact resistance and an unrivalled strength: the ultimate choice with a bright, shiny look, even after many thousands of kilometres.

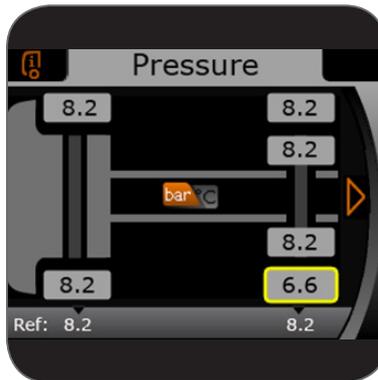

PREDICTIVE CRUISE CONTROL

An intelligent cruise function that anticipates on the road that lies ahead to support the lowest possible fuel consumption.

LARGEST FUEL TANK CAPACITY

Keep on driving: the fuel tank capacity of 845 + 590 litres is optimized for long-distance road transport.

TYRE PRESSURE MONITORING

Easy and continuous monitoring of tyre pressure and temperature for optimal tyre mileage and increased safety on the road. Correct tyre pressure reduces braking distance, improves vehicle handling and contributes to optimum fuel economy.
